

Semi-Secret Wars

Documentation Structure

Version: 0.1

This folder contains all project documentation.

The documentation should evolve alongside the game and always reflect the current state of the project.

Unknown information should never be invented. Use **TBD** until a decision has been made.

README.md

Purpose

Project overview.

Should contain:

- Game summary
- Current project status
- Engine version
- Repository structure
- Documentation links

Audience:

Everyone.

Game_Design_Bible.md

Purpose

Defines what the game is.

Contains:

- Vision

- Core pillars
- Gameplay loop
- Heroes
- Villains
- Progression
- Economy
- UI
- Art direction
- Animation philosophy
- Future ideas

Does NOT contain technical implementation.

Owner:

Lead Game Designer

AI_Development_Guide.md

Purpose

Defines how Fable develops the project.

Contains:

- Development workflow
- Coding standards
- Godot best practices
- AI token optimization
- Milestone process
- Documentation rules
- Testing workflow
- Placeholder policy

Audience:

AI Developer

Technical Lead

Programmers

BACKLOG.md

Purpose

Tracks all planned work.

Each item should contain:

- Feature
- Priority
- Status
- Dependencies
- Notes

This document changes frequently.

CHANGELOG.md

Purpose

Records completed milestones.

Each entry should contain:

- Date
 - Version
 - Systems added
 - Systems modified
 - Known issues
-

BALANCE.md

Purpose

Stores gameplay values.

Examples:

Heroes

Enemy stats

Experience

Economy

Skill trees

Damage formulas

Progression

Every gameplay value should eventually live here instead of source code.

LOCALIZATION.md

Purpose

Tracks player-facing text.

Contains:

- Localization keys
- Languages
- UI text
- Mission names
- Hero names
- Ability names

Player-facing strings should eventually use localization keys instead of hardcoded text.

DECISIONS.md

Purpose

Records important project decisions.

Each decision should include:

- Date
- Decision
- Reason
- Alternatives
- Impact

This document explains WHY decisions were made.

ART_BIBLE.md

Purpose

Defines the visual language.

Contains:

- Art direction
- Character proportions
- UI style
- Color palette
- Animation rules
- Visual references

Initially very small.

Expands as production grows.

AUDIO_BIBLE.md

Purpose

Defines the audio direction.

Contains:

- Music style
- Sound effects
- UI sounds
- Ambient sounds

Initially mostly TBD.

PRODUCTION.md

Purpose

Tracks project production.

Contains:

Current milestone

Roadmap

Future milestones

Release goals

Prototype goals

Production notes

Repository Philosophy

Every document has a single responsibility.

The project should never have one enormous document.

Instead:

Small documents

↓

Easy maintenance

↓

Easy AI context

↓

Lower token usage

↓

Better onboarding

↓

Professional organization

Documentation Rules

- Keep documents concise.
 - Update only documents affected by a milestone.
 - Never duplicate information across documents.
 - If information changes, update the original source instead of copying it elsewhere.
 - Use **TBD** when a decision has not yet been made.
 - The Game Design Bible is the source of truth for gameplay.
 - The AI Development Guide is the source of truth for development practices.
-

Long-Term Goal

The documentation should grow naturally with the project and eventually be suitable for:

- Team onboarding
- Outsourcing
- Publisher presentations
- Community contributions
- Commercial production

Documentation should always support development rather than slow it down.
